Biography

Douglas Hayman has been with CSIRO since 1992, coming from working in FM broadcasting and satellite earth stations. His projects have involved a number of electromagnetic designs including a flat plate antenna for domestic satellite reception, waveguide rotary joint design and dielectric measurements.

He has also focussed on antenna metrology and has been involved in the upgrade of CSIRO's antenna range hardware and software. He completed a BSc in 1985 and a BE (Elec) in 1987 with the University of Sydney. In 2003, he embarked on a part time PhD at Macquarie University and with the Australia Telescope National Facility in the field of focal plane arrays for radio astronomy.
