ENGG400: Industry Experience

It is a requirement of the Bachelor of Engineering degree at Macquarie University that the students should complete a minimum of 12 weeks (60 full-time equivalent days) of professional work experience before graduation. This is a degree accreditation requirement from Engineers Australia.

The work experience can be carried out as a contiguous 12-week block during a summer break, several smaller blocks of time over multiple summer breaks or in an equivalent part time manner as agreed with the selected organisation(s). The requirement can be completed during any time of the student enrolment in the degree before graduation.

Please note that it is the personal responsibility of the students to obtain industry work experience to satisfy the requirements of the Bachelor of Engineering degree. Industry experience gained during the last two years of candidature is more likely to be counted fully than experience gained in earlier years.
